

Danish Interpretation Systems

Top Level Conference Solutions

DCS 6000 Digital Conference System

The DCS 6000 system is designed as a complete solution for conference discussion, voting and simultaneous interpretation purposes. In addition to providing a sound reinforcement system for the users it can be set up to manage conference sessions in different operating modes depending on the requirements of the users.

The high-quality DCS 6000 microphone the DM 6070 with built-in loudspeaker and two channel selectors

DIS has created the best technical opportunities for the interpreters, the chairman, and the delegates - regardless of origin to be able to listen, talk, vote and understand each other and to derive full profit from the conference. Our solutions - simple or advanced - make it much easier for the delegates to keep up the dialogue.

All digital

The DCS 6000 system is a fully digital conference system based on an innovative technology and the first system in the market to handle up to 8 active microphones plus 32 different language channels simultaneously.

All DCS 6000 system components are connected in the DCS-LAN with standard, thin and flexible CAT 5 cables facilitating the installation and maintenance.

User-friendliness

Although this system is the most advanced DIS system ever, the renowned DIS philo-

sophy reaching optimum performance with a minimum of skilled efforts also apply for the DCS 6000 system.

Just connect the DCS 6000 system components to the CU 6010, switch on the main power and you are ready to work. The DCS 6000 initialises and configures itself with pre-set parameters letting you work immediately.

OSCE meeting, Slovenia
DIS equipment such as conference microphones, simultaneous interpretation and digital wireless IR language distribution systems were used at all meetings during the conference.

Ministry of Science, Prague
The elegant conference room is equipped with flush mount conference microphones with loudspeakers and channels selectors - all customised to fit the nice look of the interior.

About DIS

DIS, Danish Interpretation Systems is one of the world's leading brands of advanced conference electronics. DIS provides complete system solutions to the global meeting industry on a permanent or rental supply basis.

DIS has been engaged in product development, manufacturing and world wide sales for more than 50 years, and the DIS products today are the result of decades of accumulated know-how combined with the usage of the latest available analogue and digital technologies. DIS is represented through a global partner network in more than 70 countries and has offices in Denmark, Sweden, Norway, Belgium Thailand and UAE.

For more information please visit www.dis.cc or ask for our 8 pages DCS 6000 or SW 6000 brochure.

Conference Management Software

For more advanced use the DCS 6000 conference Management Software, SW 6000 enables extended control and enhanced features from a central pc or a client/server network. The SW 6000 supports numerous screen languages, delegate information, mimic diagram, microphone and interpretation management, system administration, multiple room selection, voting, agenda handling, messaging etc.

Portable or flush mount microphone

The DCS 6000 microphone units, the DM/CM series are all in an attractive styling for the conference participants. The portable units are designed for tabletop use with or without built-in channel selectors. The flush mount units can be equipped as you like. Both units are available as delegate (DM) or chairman (CM) versions.

Simultaneous Interpretation

The Interpreter Set – the IS 6132 is a compact multi channel interpreter set designed to provide all the facilities needed by an interpreter. The ergonomic design is a result of many years' cooperation with experienced interpreters worldwide. The unique digital DCS 6000 system provides 32 channels with excellent audio quality. The digital infrared language distribution ensures a good audio coverage and wireless receivers in an attractive and stylish design.

- Advanced digital technology
- User-friendly – easy to handle
- Reliable and stable
- Maximum audio quality
- The best speech intelligibility
