High quality 3D images and video at an affordable price

The Planar SA2311W is a sleek, attractive desktop LCD monitor designed for 3D viewing, but this affordable widescreen display is ideal for 2D use as well. Whether you're playing the latest 3D game or modeling complex biomolecules, the blazing fast 120Hz frame rate and 2 ms response time deliver crisp, clear images and blur-free video. The 3D Vision certified SA2311W uses the 3D Vision[™] Kit and an appropriate video card from NVIDIA to produce impressive stereo imaging.

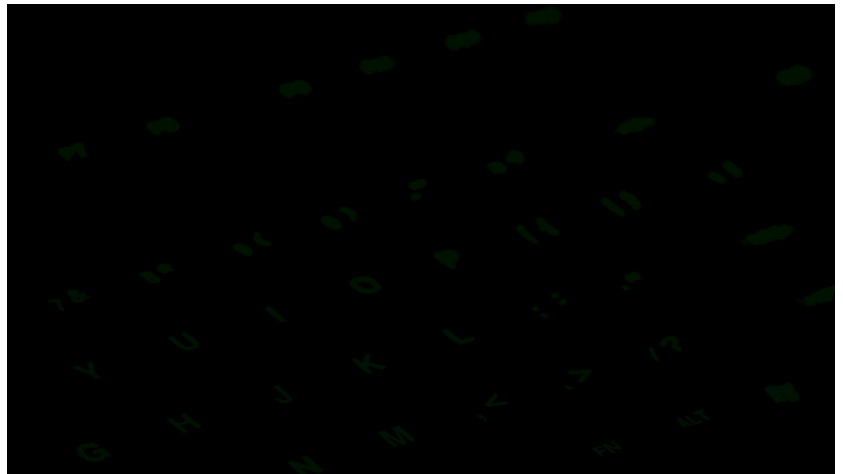

ProGlow™ Keyboard

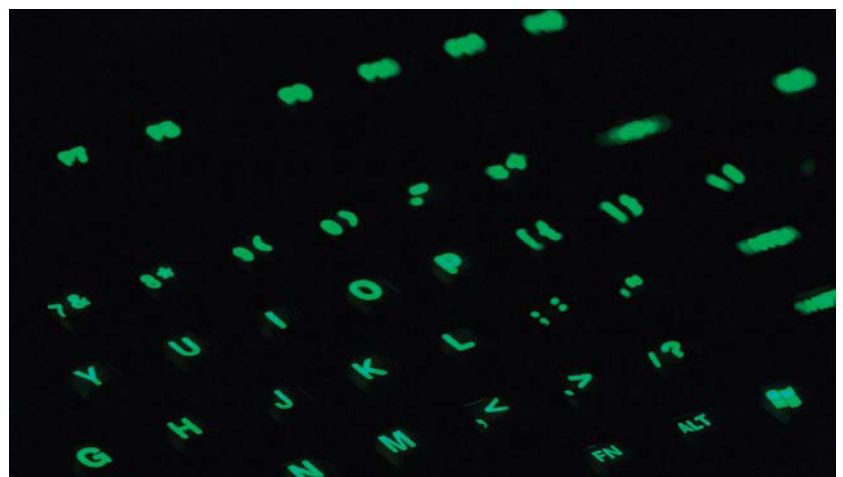

ProGlow™ The world's first keyboard designed for professional users of 3D monitors.

- See your keyboard through active LCD shutter glasses
- 7 adjustable light levels, plus off
- An LED for every key allows viewability in low ambient light to maximize contrast on your display
- Excellent tactile feedback
- 105 key, QWERTY design
- USB

DO YOU SEE THIS THROUGH YOUR STEREOSCOPIC GLASSES?
